

UNITED HYDRAULIC CONTROL is Appointed Service partner of Danfoss Products for India. We have repairing and testing facility of various products of Danfoss like Piston pumps, motors, valves and steering units. We are equipped with 3 test rigs. One is SCADA based (Computerized) rig for Piston pumps and motors. Another is also for testing piston products in paired condition. Third is for testing Steering units with or without priority valve. Our assembly room for repaired products follows controlled level of air or contamination to ensure highest level of workmanship.
